

SHELDON LINQ ACADEMY

TRAINING COURSES

The Sheldon LINQ Academy offers professional development to complement the range of educational digital technologies offered by Modern Teaching Aids.

Our Academy offers three streams of professional learning:

INSPIRE

The Inspire stream is designed to provide educators with hands on experience and dedicated time to ask questions about a range of tools and resources. This session is recommended for educators who require an introduction or refresher course in one or more resources acquired from MTA.

2 hour session for up to 5 attendees = \$500

CHAMPION

The Champion stream will provide educators with pedagogical applications for how the resources can be used in the classroom. Educators will leave this workshop with classroom projects and sample lessons plans to relate to one or more of the resources acquired from MTA.

2 hour session for up to 5 attendees = \$500

MASTER

The Master stream provides an extensive overview of the tools and processes needed to design your own curriculum and an in-depth understanding of how to lead these programs in your school.

7.5 hour session for up to 5 attendees = \$1500
